

## **DUFAMEC 1% INJ**

### **Composition:**

Contains per ml solution:

Ivermectin .....10 mg

### **Description:**

Dufamec 1% is an injectable solution containing ivermectin, an antiparasitic agent with activity against many endo- and ectoparasites.

### **Indications:**

Endo- and ectoparasitic infections in cattle, sheep, swine, dogs and cats, caused by parasites susceptible to ivermectin.

Cattle: Gastrointestinal nematodes, lungworms, eye worms, warbles, mites and lice.

Sheep: Psoroptic mange (sheep scab), gastrointestinal nematodes, lungworms and nasal bots.

Swine: Gastrointestinal nematodes, lungworms, lice and mange mites.

Dogs: Gastrointestinal nematodes, infective-stage heartworms, microfilariae, arthropods and ear mites.

Cats: Gastrointestinal nematodes and lungworms.

### **Contraindications:**

Hypersensitivity to ivermectine. Do not use in dog breeds with genetic sensibility to ivermectin (Old English Sheepdog, German Shepherd, Collie) or in other animal species as severe reactions may occur.

### **Dosage and administration:**

For subcutaneous administration.

Recommended dose: 0.2 mg ivermectin per kg, swine 0.3 mg ivermectin per kg body weight.

Cattle ..... 1 ml per 50 kg body weight

Sheep ..... 0.5 ml per 25 kg body weight

Swine ..... 1 ml per 33 kg body weight

Dogs and cats ..... 0.1 ml per 5 kg body weight

Dose accurately to prevent development of resistance caused by underdosing.

### **Withdrawal times:**

Meat: 21 days (cattle and sheep)

28 days (swine).

Do not use in cows producing milk for human consumption.

Do not use in non-lactating dairy cows within 28 days prior to calving.

### **Storage conditions:**

Store dark and below 25°C. Do not freeze.

### **Packing:**

50 ml and 500 ml vials.
