

DUFALBEN 10% ORAL SUSP

Composition:

Contains per ml suspension:

Albendazole 100 mg

Description:

Effective broad spectrum anthelmintic, for the control of roundworms, tapeworms, and flukes of domestic animals.

Indications:

Endoparasitic infections in cattle, sheep and goats, caused by parasites susceptible to albendazole.

Larval and adult stages of *Haemonchus*, *Ostertagia*, *Trichostrongylus*, *Nematodirus*, *Cooperia*, *Bunostomum*; adult stages of *Oesophagostomum*, *Chabertia* and *Strongyloides*, *Dictyocaulus* spp (lungworm), *Moniezia* spp (tapeworm) and *Fasciola hepatica* (adult liver fluke).

Contraindications:

Hypersensitivity to albendazole or to any of the excipients. Do not administer to animals with impaired hepatic function.

Dosage and administration:

For oral administration.

Recommended general dose: 3 ml per 40 kg body weight (ca. 7.5 mg Albendazole / kg b.w.)

For control of adult liver flukes (*Fasciola hepatica*): 4 – 6 ml per 40 kg body weight (ca. 10-15 mg Albendazole / kg b.w.)

Shake well before use!

The body weight of animals should be determined with accuracy.

Precautions and warnings:

Avoid administration during early pregnancy (first 45 days).

Dose accurately to prevent development of resistance caused by underdosing.

Withdrawal times:

Meat and offal: cattle 28 days

sheep, goats: 8 days

Milk: 4 days (8 milkings)

Storage conditions:

Store below 25°C. Do not freeze.

Packing:

1 litre cans.
