

## **DUFAMEC-N 5/250 INJ**

### **Composition:**

Contains per ml solution:  
5 mg Ivermectin and 250 mg Nitroxinil.

### **Description:**

Dufamec-N is an injectable solution containing ivermectin and nitroxinil. Ivermectin is an antiparasitic agent with activity against many endo- and ectoparasites. Nitroxinil is a fasciolicide, which is effective against *Fasciola hepatica* and *Fasciola gigantica* infestations and has some activity against gastrointestinal nematodes such as *Haemonchus contortus* and hookworms.

### **Indications:**

Endo- and ectoparasitic infections in cattle and sheep, caused by parasites susceptible to ivermectin and nitroxinil.

Cattle: Gastrointestinal nematodes, lungworms, liver flukes, eye worms, warbles, mites and lice.

Sheep: Gastrointestinal nematodes, lungworms, liver flukes, nasal bots and psoroptic mange.

### **Contraindications:**

The product should not be used in other species as severe adverse reactions may occur.  
Not to be used in case of hypersensitivity to any of the active substances.

### **Dosage and administration:**

For subcutaneous administration.

General dosage: 0.2 mg ivermectin per kg bodyweight and 10 mg nitroxinil per kg bodyweight.

1 ml Dufamec-N 5/250 inj per 25 kg bodyweight.

The body weight of animals should be determined with accuracy.

### **Side effects:**

Injection site reactions.

### **Precautions and warnings:**

Dose accurately to prevent development of resistance caused by underdosing.

Avoid using alongside other medications. Nitroxinil stains, avoid spilling.

### **Withdrawal times:**

Meat and offal: 30 days

Do not use in animals producing milk for human consumption.

Do not use in non-lactating dairy cows within 28 days prior to calving.

### **Storage conditions:**

Store dark and below 25°C. Do not freeze.

### **Packing:**

100 ml vial.
