

DUFATIL 25% ORAL

Composition:

Contains per ml oral solution:

Tilmicosin (as phosphate) 250 mg

Description:

Tilmicosin is a broad-spectrum, semi-synthetic antibiotic synthesized from tylosin with bactericidal activity against gram-positive and gram-negative bacteria, predominantly *Mycoplasma*, *Pasteurella* and *Haemophilus* spp.

Indications:

Respiratory infections in calves, poultry and swine, caused by microorganisms susceptible to tilmicosin.

Contraindications:

Hypersensitivity to tilmicosin. Animals intended for breeding purposes. Animals with active microbial digestion.

Dosage and administration:

For oral administration in drinking water or (artificial milk).

- Poultry: ca. 15 – 20 mg/kg body weight (75 mg/litre of drinking water, equivalent to 300 ml per 1,000 litres of drinking water, daily, for 3 consecutive days.
- Pigs: 15 – 20 mg/kg body weight, equivalent to 0.6 – 0.8 ml per 10 kg body weight, daily, for 5 consecutive days.
- Calves: 15 – 20 mg/kg body weight, equivalent to 6 – 8 ml per 10 kg body weight, daily, for 3 - 5 consecutive days (in drinking water or artificial milk pre-warmed at 40°C).

Shake well before use!

The consumption of drinking water should be determined with accuracy. Medicated water should be used immediately and refreshed for every 24 hours for the duration of treatment.

Side effects:

Transient decrease in water or (artificial) milk intake can occur.

Precautions and warnings:

It is recommended that the susceptibility of the causative microorganisms is established before treatment is started.

Use in pregnant or lactating animals only after risk/benefit assessment by a veterinarian.

Severely sick animals have altered drinking patterns and may need to be medicated parenterally.

Withdrawal times:

Meat and offal: 42 days (calves), 12 days (broilers); 19 days (turkeys), 14 days (swine).

Do not use in layers producing eggs for human consumption.

Storage conditions:

Store dark and below 25°C. Do not freeze.

Packing:

240 ml and 1 litre bottles.
