

OXYTETRACYCLINE 40% W.S.P.

Composition:

Contains per g water soluble powder:
Oxytetracycline HCl 400 mg

Description:

Oxytetracycline is a highly active, broad spectrum tetracycline antibiotic with bacteriostatic activity against a wide variety of gram-positive and gram-negative organisms.

Indications:

Bacterial infections caused by microorganisms susceptible to Oxytetracycline and secondary associated bacterial infections during the course of viral or infectious diseases.

Poultry

Respiratory infections , i.e. C.R.D. (*Mycoplasma gallisepticum*, *Mycoplasma sinoviae*), gastrointestinal infections (*Escherichia coli*), fowl cholera (*Pasteurella multocida*), etc.

Swine

Respiratory infections (*Pasteurella multocida*, *Mycoplasma hyopneumoniae*, *Bordetella bronchiseptica*), gastrointestinal infections (*Escherichia coli*, *Salmonella choleraesuis*) etc.

Contraindications:

Hypersensitivity to tetracyclines, severe hepatic or renal impairment. Do not use in other species than those recommended.

Dosage and administration:

For oral administration in drinking water or feed (pigs).

Poultry: ca. 30 mg per kg body weight, equivalent to ca. 300 g per 1000 litres of drinking water, daily, for 3-5 consecutive days.

- Swine: ca. 30 mg per kg body weight, equivalent to:

0.75 g per 10 kg body weight,

0.5-1.0 g per 1 litre of drinking water, daily, for 3-5 consecutive days,

400 ppm in feed (1 kg per tone of feed).

The consumption of drinking water should be determined with accuracy. Medicated water should be

used immediately and refreshed for every 24 hours for the duration of treatment.

Side effects:

Gastrointestinal disturbances.

Precautions and warnings:

Severely sick animals have altered drinking patterns and may need to be medicated parenterally. Dosage may need to be adjusted to reflect herd or flock water consumption.

Withdrawal times:

Meat and offal: 8 days (swine)
6 days (poultry)

Eggs: 5 days

Storage conditions:

Store dry and below 25°C. Do not freeze.

Packing:

1 kg jars.
