

DUFA-MINT PLUS LIQUID

Composition:

Contains per ml solution:

Eucalyptus oil 176 mg

L-Menthol oil 37 mg

Description:

Dufa-Mint Plus Liquid is a complementary feed for poultry, swine, calves and lambs. It supports the respiration of the animal and relieves breathing which alleviates respiratory problems. It can also help alleviate extreme post vaccination reactions and has a cooling effect when heat stress occurs. The main components of Dufa-Mint Plus liquid are Eucalyptus and Menthol.

Eucalyptus oil has a relaxing effect on the muscles of the respiratory system. It will irritate the nasal mucous membranes facilitating the removal of discharge together with harmful dusts, thus restoring patency of the respiratory tract and at the same time facilitating breathing and ventilation of an organism. A proper cross section and patency of the respiratory system provide a guarantee of appropriate ventilation of the air sacs.

Menthol act as an expectorant when it is in contact with mucous membranes of the respiratory tract. It will facilitate purification of the respiratory tract from small dusty pollutants. Menthol has also a relaxing, antibacterial and cooling effect. In periods of high temperature an addition of an agent with a cooling effect on an organism is a very beneficial solution.

Directions for use:

Dufa-Mint Plus Liquid is a complementary feed for administration in drinking water.

Poultry, swine, calves and lambs: 200 ml per 1000 L of drinking water.

Withdrawal times:

None.

Storage conditions:

Store dark and below 25°C. Do not freeze.

Packing:

500 ml and 1 litre bottles.
