

# Feed instructions DufaFeed Calf Milk-Rep

## 1. Calculate the amount of DufaFeed Calf Milk-Rep per calf based on age.

*First 2 days: Feed colostrum. 4 times a day. As soon as possible and as much as possible.*

Age Calf (in weeks)	Liter / Feeding time	Feeding time / day	Remarks
1 (day 3-7)	1.5	2 – 3	From day 5: Provide water
2	2.5	2	Provide water and hay/straw
3	3	2	Provide water, hay/straw and concentrates
4	3	2	Provide water, hay/straw and concentrates
5	3	2	Provide water, hay/straw and concentrates
6	3	2	Provide water, hay/straw and concentrates
7	2.5	2	Provide water, hay/straw and concentrates
8	2	2	Provide water, hay/straw and concentrates
9	2	1	Provide water, hay/straw and concentrates
10	2	1	Provide water, hay/straw and concentrates

## 2. Calculate the correct mixing ratio based on the total amount of milk replacer needed to feed the calves this feeding time.

Amount complete DufaFeed Calf Milk-Rep	Amount of powder	Amount of water
1 L	125 gr	875 ml
2 L	250 gr	1.75 L
4 L	500 gr	3.5 L
6 L	750 gr	5.25 L
8 L	1 kg	7 L
10 L	1.25 kg	8.75 L
20 L	2.5 kg	17.5 L
30 L	3.75 kg	26.25 L
40 L	5 kg	35 L
50 L	6.25 kg	43.75 L
60 L	7.5 kg	52.5 L

## 3. Create the perfect DufaFeed Calf Milk-Rep.

- ✓ Make sure that all the utensils are clean before the start of creating DufaFeed Calf Milk-Rep.
- ✓ Weight the correct amount of powder based on calculations in step 1 and 2.
- ✓ Put the right amount of powder in a clean bucket.
- ✓ Let the water warm up to the right temperature (45 - 50 °C).
- ✓ Fill the bucket with powder and add half the amount of water (based on calculations in step 2).
- ✓ Mix the composition thoroughly until it is a homogeneous mass.
- ✓ Mix while adding the other half amount of water to reach the advised milk replacer amount.

## 4. Feed DufaFeed Calf Milk-Rep.

- ✓ Clean the feeding bins of the calves. Remove all residues from previous feedings.
- ✓ Check the temperature of the created DufaFeed Calf Milk-Rep. Feeding temperature: 36 - 40 °C.
- ✓ Feed the calves the right amount of DufaFeed Calf Milk-Rep based on their age. Keep in mind that the feeding schedule based on age is a recommendation. The development, condition and health of the animals are the most important indications. So if needed, adjust the amounts according to the needs of the calves.
- ✓ Feed at routine and regular intervals to avoid gorging and upsetting the digestive system of calves.
